# IOT Smart Light

Summary

This project is a part of home automation. Here light is controlled by NodeMCU(ESP8266) and NodeMCU controlled by and any kind of device which is connected with same network. Here created a server in nodemcu and a webpage to control the light.

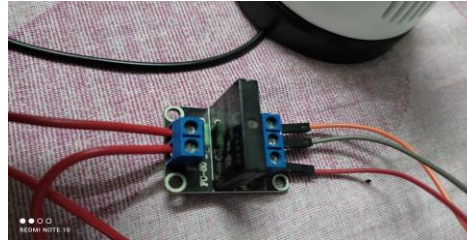

Home Automation Using NodeMCU

Hardware
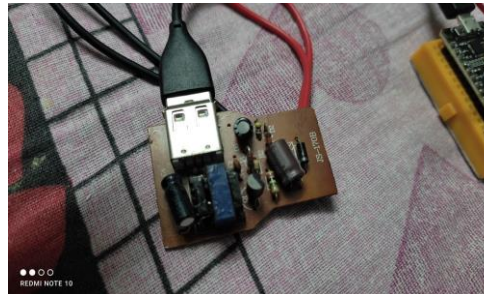

NodeMCU(ESP8266)

220v Relay

Power supply 220v to 5v

Light, wire

Programming Language

- C , C++

- HTML

- CSS
